FOR MORE INFORMATION**

*Ultra-fine fibers coupled with intense surface contact or “mechanical action” of the cloth results in effective pick up of particles and contamination at the micron level

**Independent lab study, conducted by PDA Labs, Inc., the cloth, without the use of any disinfectant, removes the microbial contaminate Clostridium difficile (C-Diff) from stainless steel and vinyl surfaces with effectiveness of > 99.99%

***MicroOne® disposable cloths are compatible with common disinfectants in healthcare and pharmaceutical industries
