

# r-MicroOne Premium CombiSpeed Pro

Mop is made from 88% recycled material

## Product Description

r-MicroOne Premium CombiSpeed Pro is a Vileda Professional single use mop made from 88% recycled material and being recyclable itself. It combines benefits of sustainability and cleaning efficiency. The pocket mop consists of a high quality microfibre pad which allows an effective, hygienic cleaning and up to 99.99% virus and bacteria removal. The high absorbency of the mop is perfect to optimize cleaning processes even more, promising up to 30% extra floor coverage in comparison to other single use mops. The r-MicroOne Premium CombiSpeed Pro is 100% compliant with quat-based disinfectants and suitable for Pre-prepared and Bucket method.

The pocket mop r-MicroOne Premium CombiSpeed Pro is available in 4 colours. Due to this an adaption to individual and hygienic cleaning concepts is possible and cross-contamination can be avoided efficiently.

## Application area

It is ideal for the use in healthcare, such as high risk areas, i.e. isolation rooms, first aid rooms, patient rooms and other hygiene sensitive areas. Versatility and ease of use make r-MicroOne Premium CombiSpeed Pro additionally ideal for the use in a multitude of environments beside healthcare, such as general building cleaning, hotels, restaurants, and catering, even for uneven or heavily-soiled surface. It is suitable for Pre-prepared and Bucket method

## Advantages

- Maximum hygiene due to the removal of up 99,99% of viruses and bacteria – as certified by an independent external test institute
- Excellent cleaning performance due to advanced microfibre technology
- 30% more floor coverage versus comparable single use mops

- Made from 88% recycled material
- 100% recyclable after usage
- Suitable for Pre-prepared and Bucket method
- No complicated laundry logistics
- Guaranteed compatibility with 40cm pocket frames and the Combi-Speed Pro system
- 4 colour systems for simple differentiation of mops and individual adaptation to your hygiene system

## Storage, disposal and end-of life
